SALARY RANGE

£45–55k

COMMITMENT

Full Time

LOCATION

Remote (Core UK Hours)

ABOUT FIELD LEVEL TECH

We're a non-profit using tech to level the playing field. We're building technology that empowers people, advances democracy and ensures the future of AI works for everyone.

We're a passionate team who all love what we do. Join us and help guide our big projects!

REQUIRED

- Leadership experience. Experience in mentoring and development.
- Experience building the runtime layer around LLMs — agent loops, tool use, context/memory handling, and multi-step coordination.
- A belief that technological progress can be a force for economic justice.
- A hunger to learn how we bridge that gap.

THE JOB

A senior role engineering our agentic orchestration system to speed up development, turn ideas into reality, and ship the tools that level the playing field at scale.

PREFERRED

- Rust
- CI/CD Experience
- Ops Experience

We've intentionally kept this job ad brief because we believe in high signal-to-noise ratios!

Apply at jobs@fieldleveltech.org with CV / Portfolio / GitHub link. Cover letters are greatly appreciated — we always read them — but we understand everyone's busy.

The application process will involve a paid task and interview/s.

JOB IS OPEN UNTIL FILLED
